PROGRAMMER/ANALYST

Logica Computer Services requires a Programmer/Analyst with RPG II and IBM SYSTEM 34 experience. The environment is time sharing and client service, with maintenance programming and direct client contact being the norm.

Applicants should be versatile and be able to deal with clients in a mature and professional manner.

They will possess the following skills;

- Interactive RPG II Programming
- In-depth experience of all IBM System 34 Utilities
- Systems Analysis and related skills
- Strong interpersonal, and report writing skill

A competitive salary and full range of benefits are offered to applicants with the above skills. Qualified individuals should send resumes to Mr. Peter Riddell.
