SCIENCE AND THE WORLD AROUND US EXPO

See how science is driving innovations in forestry, transportation, mining and more. Plus career roundtables, fun activities and an exploration zone for kids!

Monday, April 11, 2011 10am-7pm
Tuesday, April 12, 2011 9:30am-2pm

Prince George Civic Centre 808 Civic Plaza

SPEAKERS:

GEORGE STEDEFORD

What are emissions?

Mr. Stedeford will give an on-the-ground perspective of emissions and our potential role in reducing them.

DR. EILEEN VAN DER FLIER-KELLER

Water: why does it matter?

Why is freshwater such a rare and valuable commodity? Dr. Van der Flier-Keller shares the answer to this and other water mysteries.

DR. LEONARD FOSTER

The plight of the honey bee

Dr. Foster shows how his research is helping to strengthen bees' natural mechanisms to fight off diseases and thrive.
