A Healthy Community Includes Us All!

What is a Healthy & Sustainable Community?

Promotes local and equal opportunity for employment, limits income leaving the community and gains maximum local value from resource use. It's economy is based on the sustainable harvest and conservation of resources and local ownership. The vision for this Committee of Prince George as a healthy and sustainable community, is a city which:

- has a strong community focus and sense of civic pride;
- develops and preserves a clean, safe, accessible, attractive, and sustainable environment;
- offers equal access to health, housing, education, employment, recreation, and the arts;
- provides access to a wide variety of services that are intergenerational, accessible, supportive, coordinated, planned, responsive to change, and effective;
- encourages diversity and choices in the delivery of support programs that promote health & sustainability, are prevention oriented, and community based; and
- develops and maintains a comprehensive data base for planning and evaluation.
