The Angler's Atlas

AnglersAtlas.com

popular fly fishing lake for many anglers in the spring and fall seasons. The lake is stocked with rainbow trout every year, and is known to produce some large fish—up to 20 inches on occasion.

But be prepared for a challenge, as this lake can frustrate even the most dedicated angler. Lewis Johnson, local author and guide, calls this lake "finicky" at times, but says if you are patient it can reward you with a real trophy.

Johnson's preferred patterns for this lake are woolly worms, Doc Spratleys, and dragon fly nymphs. He also suggests trolling a woolly bugger very slowly, using fast sink lines in the deepest sections of the lake.

He just returned from a fishing trip to the lake and says the water is still relatively warm. For best results he suggests using woolly buggers down deep.

His book, **The Chronic Flyfisher**, can be purchased in local bookstores and tackle shops, and makes a great Christmas gift for those who want to learn more about local lakes and how to fish them.

Cast Into Marmot Lake This Fall

LAKE ACCESS:

From Prince George, head south along Highway 97 to Quesnel, then look for the sign that reads "West Quesnel". This will take you west, across the Fraser River. At the end of the bridge, follow the sign saying "Nazko," which will turn to the right. Follow this road for about 88 km, until you meet the Nazko General Store. The lake is located across from the store.

Quick Facts

Gazetted Name

- Marmot Lake

Surface Area

- 54 Hectares (133 Acres)

Maximum Depth

- 16.0 metres (52 feet)

Elevation

- 850 metres (2,789 feet)
