

Business and Technology Representative Nominees

Kyndra Farrell

Program: **Business Management**

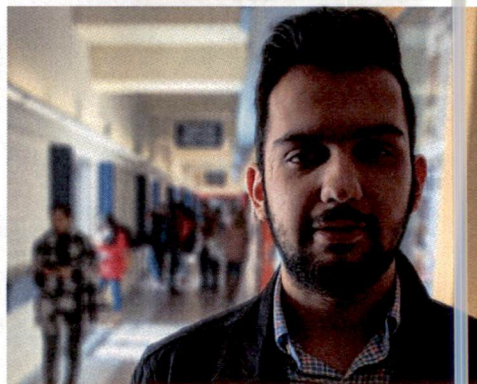

My Goals: "The reason I am campaigning is to give myself a platform where I am able to not only help the students, but have connections with the administration and faculty to get my message out there. That message would be getting back sports to the school, and more clubs and events for students to interact and meet together in a new fun way."

Harsehaj Singh Sahota

Program: **Business Management**

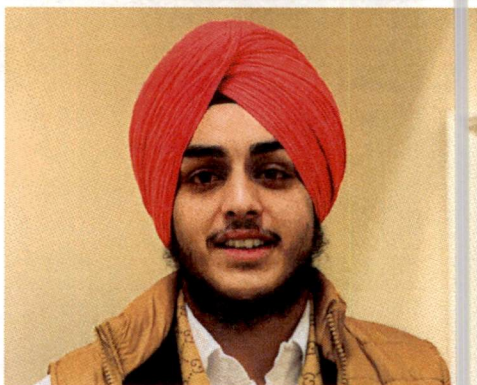

My Goals: "My main motive is to help new students with problems that they may not know about. My request to everyone is if they have a problem, tell me, I will make sure I will help them. Also, I plan on having camps and activities for girls so they can have things to do outside of school."

Tajinder Singh

Program: **Business Management**

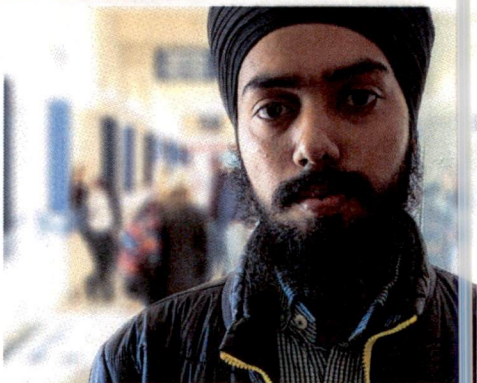

My Goals: Tajinder was not available to comment.

Gagandeep Singh

Program: **Business Management**

My Goals: My goals as Business and Technology Representative is to have more job opportunities and accommodations for students at the college. I think that more guidance is needed for students, and more should be done for students looking for academic advising. CNC courses should be more clear and accessible to students as well.

Navjot Singh

Program: **Kinesiology**

My Goals: "I am looking for a good environment for students in the college, old and new, international and domestic. I plan on making a good environment for them for jobs and classes. The college needs more sections, as there aren't enough courses. We also need more events and sports for students to participate in."
